General

Hold down the spin button to cast your line.

Once a wager is placed an initial credit amount may appear on the water, the hook may pop out of the water, or a bonus fish may attempt to bite the hook.

Initial credit amount range:
1.00 - 15.00

If an initial credit amount appears, holding the spin button may increase the credit amount further, catch the fish and award the credit amount, or break the line.

Credit amount increase range:
5% - 7303%

Press COLLECT at any time during a game before the line breaks to collect the credit amount.
The game concludes when a credit is awarded or collected, the bonus concludes, or the line breaks.

Total Base Game win:
Initial credit amount x (100% + credit amount increase)

Credit awards are multiplied by the bet multiplier of the winning game.

KEEP HOLDING TO REEL IN FISH

≪ ≡ PAYTABLE X

Credit awards are multiplied by the bet multiplier of the winning game.

Your bet multiplier is equal to the number of credits played divided by 0.20. For example, 0.40 credits bet per spin = 0.40 / 0.20 = a bet multiplier of 2.

All payout tables display the number of credits that are won for each combination for the current bet multiplier.

Malfunction voids all pays and plays.

Multiplier Feature

If an initial credit amount appears, the multiplier feature can randomly trigger.

When the multiplier feature is triggered, any award or collected amount is multiplied by up to 10 times and the game concludes.

Credit awards are multiplied by the feature bet multiplier.

Feature wins are added to regular wins.

Golden Hook™ Bonus

If a bonus fish appears the bonus may be awarded.

The bonus consists of a random number of fish with assigned credit amounts, and a random number of 2X multipliers.

If a fish is collected, the credit amounts are awarded to the player.

If a 2X multiplier is collected, the current cumulative bonus total is multiplied by 2 times.

The bonus concludes when the last fish or 2X multiplier is collected.

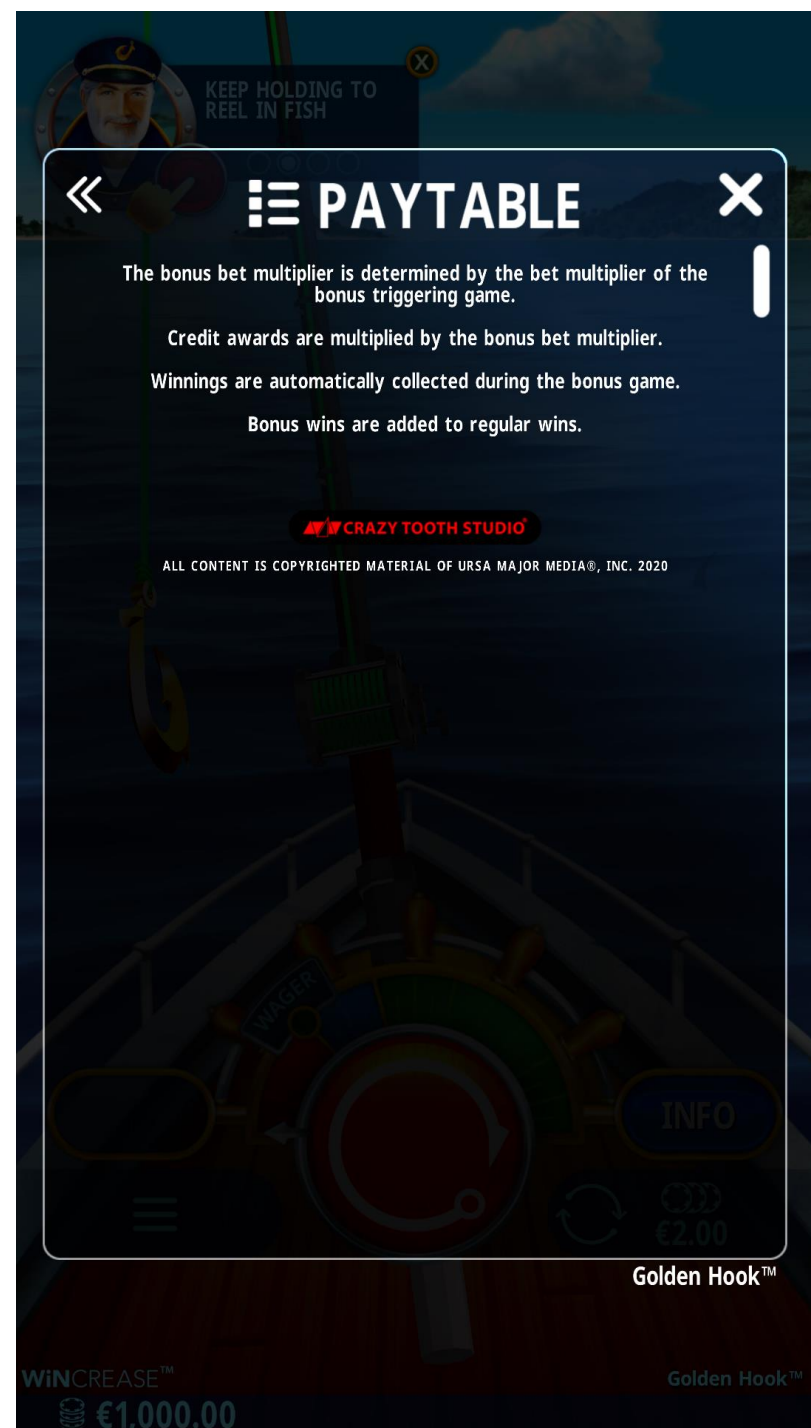

The bonus cannot be retriggered.

The bonus bet multiplier is determined by the bet multiplier of the bonus triggering game.
