EYE of ANUBIS™

Business Summary

Plunge into the mysterious world of ancient Egypt in this collapsing 8x8-cluster game. Scarab Wilds shift whenever they form a win, increasing their win multiplier with each move. In Free Games, the eye of Anubis win multiplier boosts all wins, including wins already multiplied by a scarab. Land more wilds to increase the eye of Anubis win multiplier for giant wins!

This game can be played on the following devices and orientations:

- Desktop
- Tablet in both landscape and portrait modes
- Mobile in both landscape and portrait modes

For information on supported mobile devices and information on how to configure game limits to control house exposure, see the [GPAS Integration Options](#) document.

This game supports Free Spins Bonus (FSB).

Business Case

- Shifting Wild symbols with increasing multipliers in both the main game and free games feature keeps the player spinning the reels.
- 3 or more Wild symbols on reels trigger Eye of Anubis Free Games feature; the values that appear on the triggering Wild symbols forms the initial Eye of Anubis win multiplier.
- In Free Games, wins are multiplied first by the value on each contributing Wild symbol, then by the eye of Anubis Win multiplier, providing massive and exciting win potential.
- Wins cause the reels to collapse, allowing new wins to form and more Wild symbols to drop and trigger Free Games.

Eye of Anubis™

Symbol Details

WILD SYMBOL

The scarab symbol is the **WILD** symbol in the game.

WILD symbols substitute for any other symbol to form the best possible winning combination.

3 or more scarab symbols anywhere on the reels trigger **Eye of Anubis Free Games**.

EYE of ANUBIS™

Game Features

Eye of Anubis Free Games

3 or more **SCARAB** symbols simultaneously landing anywhere on the reels trigger 6 **Eye of Anubis Free Games**.

When the **Eye of Anubis Free Games feature** is triggered, the values of all **SCARAB** symbols' win multipliers worth x2 or more are combined in the eye of Anubis and become the **Free Games** win multiplier.

Note: The eye of Anubis is located above or beside the reels.

The multiplier value in the eye of Anubis is applied after a **SCARAB** multiplies the win (if applicable).

Note: The multiplier value in the eye of Anubis applies to every win during the Eye of Anubis Free Games.

Additional **SCARAB** symbols that appear with a multiplier of x2 or more during **Free Games** increase the multiplier value in the eye of Anubis by the value of their multiplier after the reels have finished collapsing.

When the **Eye of Anubis Free Games** feature ends, press on the resulting pop-up screen to return to the main game.

Collapsing Reels:

5 or more matching symbols vertically and/or horizontally adjacent anywhere form a win.

Winning symbols disappear after they pay out, causing non-winning symbols above them to drop and new symbols to fall from above.

The reels will continue to collapse until no new winning combinations are formed.

Win Multiplier

The win multiplier value of each **SCARAB** symbol starts at 1 and applies to every win the symbol contributes to.

After the **SCARAB** symbol forms a win, the multiplier value on that **SCARAB** will increase by 1 and the **SCARAB** symbol will move to an adjacent empty position for the next collapse.
