## HOW IT WORKS

The screenshot shows the 'Dead Canary' game interface during an 'Action Spins' feature. A central table displays the results of 10 spins. Annotations point to various UI elements: 'Bet Size' (€ 1.00), 'Total Amount Spent' (€ 56), 'Total Amount Won' (€ 38.00), 'Exit Action Spins' (X icon), 'Replay Round in Game' (play button), 'Add or Deduct Rounds' (+/- buttons), 'No. of Action Spins Remaining' (10), and 'Continue / Pause Action Spinning' (play/pause button). The table columns are 'Rounds', 'Win', 'Current Balance', 'Win Multiplier', and 'Monetary Value'.

Rounds	Win	Current Balance	Win Multiplier	Monetary Value
56 14:52:53	Win	€ 12068.10	0.50 x	€ 0.50

## FAQs

### Why Action Spin?

Bet big, win big! Action Spinning is the perfect way to get through a large number of base game rounds or bonuses. For base game players, we foresee this will be popular for those with 'Bonus Hunt' playstyles as well as being an alternative option to buying singular bonus rounds.

### What about regulated markets?

'Action Spins' will be **disabled** across all regulated markets. We hope to receive further feedback from you on whether there are any regulated markets where 'Action Spins' should be enabled from your point of view - a reminder that this feature will have a mix of autoplay and bonus buy interpretation from a regulatory standpoint, so we aim to avoid any loose ends on this front.

### Do we need to do any extra work?

No! 'Action Spins' do not require any additional work on your end. Action Spins will be enabled by default and everything will be enabled on our side - unless you wish to opt out.

### Can we disable the feature?

Yes. The Nolimit team can disable the feature entirely should you wish to exclude it from your brand.

### Will all games have Action Spins?

Not at first. We will start with an initial batch of games and each new release moving forward. The pending back catalogue may be added at a later date.
