GAME ID	OnAir AutoRoulette

GAME RULES AND STATISTICAL CHARACTERISTICS

Game Objective

Auto Roulette is based on European Roulette rules. The roulette wheel consists of 37 pockets numbered 0-36 where 0 represents single zero. The objective of the game is to predict the number of the wheel's pocket where the spun ball will eventually land.

Placing Bets

To place a bet, chip value must be selected and placed on one or more bet spots on the betting grid or racetrack. Any placed bets that are below the minimum bet limit for the table are not valid and will not be accepted. Any placed bets that are above the maximum bet limit for the table are automatically adjusted to match the maximum limit.

Spinning

After betting time has expired, ball is spun within the Roulette wheel. When the status bar indicates "NO MORE BETS" further bets will not be accepted, and placed bets will not be modified/changed.

Game Outcome

The ball will eventually land in one of the numbered pockets within the wheel and the winning number will be announced. The player will win if has placed a bet that covers that particular number. Payouts are made according to payout table.

STATISTICAL CHARACTERISTICS

- This game features advanced betting options.
- The game is based on standard European Roulette rules

- Payout prercentage: 97.30%
