DEAL ME IN!

Immerse your players in some exciting video poker action as they choose which cards to hold and which ones to draw to help make their best possible poker hand and a matching payout.

FLUSHED WITH SUCCESS

A pair of Tens or higher is all your players need to secure a payout, but it's the glorious Royal Flush where the big money lies, as it pays a whopping 4,000 coins with a 5-coin bet in play.

GOLDEN GAMBLE

On wins up to 100 coins the player can choose to gamble, where finding a higher card than the one revealed will double the current winnings, with up to 5 gambles allowed per round.

WINNING DRAW

Tens or Better is classic 5-card draw poker, where the player is dealt 5 initial cards and can hold or discard as many as they like for the second draw in search of a winning hand.
