The Wild symbol substitutes for all symbols except scatters and doubles the resulting win (except for Wild only winning lines).

### **Free Spins bonus round**

When 3 or more Scatter symbols appear in the window, the Free Spins Bonus Round is awarded.

- Scatter symbols also award a payout as per the Pay Table above.
- Free Spins are played on a separate set of reels.
- 15 Free Spins are awarded.
- All wins in the Free Spins are multiplied by x3.
- Free Spins can be re-triggered. 15 more spins are added to the count. The Multiplier remains the same. Any award associated with the Scatter prize is paid x3 due to the Multiplier.

### **Maximum Payout**

The maximum payout in any one game is 5,000x Total Bet. If this value is reached in the bonus round, all further free spins and wins are cancelled and the player is paid the maximum payout value.

## **Bonus Buy**

Note: This is prohibited in a number of gaming jurisdictions and is automatically disabled where necessary.

Pressing the Bonus Buy button will display the Bonus Buy screen displaying the RTP, maximum payout and cost to purchase.

Pressing the Buy button will display a confirmation popup. Pressing the cross button will return to the Bonus Buy screen. Pressing the tick button will charge the player the displayed cost and start the bonus round.

The bonus round is triggered by the reels spinning to 3 Scatters.

### **Please note:**

When buying a bonus round, the cost is a multiple of the base game bet value. All prizes (and maximum payout) are therefore the same as if the bonus round had been triggered in the base game. For example, if the bonus round is bought (cost 111x) and the base game bet value is 1.00, the cost to buy the bonus round will be 111.00 and the maximum payout will be 5,000.

## **General Information**

### **Random Game Play**

This game is totally random; the odds of getting any particular outcome are always the same and are not based on any other factors or prior outcomes e.g. stake value, previous wins or losses, time of day, account balance, etc.

### **Return to Player Percentage**

The expected return to player (RTP) reflects the theoretical return over a large number of plays. The RTP is expressed as the percentage returned to players in winnings of the total amount staked, e.g. if £1,000,000 was staked and £960,000 was returned, the RTP of the game for that period of play would be 96%.

The actual RTP during a playing session can vary widely, in either direction, from the theoretical return.

Game rules and information can be accessed from inside the game in all formats by pressing the Menu button just above the clock at the bottom-right of the game area.
