Red or Blue Dice (Mixed) (SCATTERS)	Free Spins	Free Spins	Free Spins

3, 4 or 5 Dice trigger the Free Spins Bonus Round.

6 Appeal symbol is Wild for all symbols except Dice.

Free Spins Bonus Round

The Red and Blue Dice are Scatter symbols and as such pay anywhere in view. Any combination of 3, 4 or 5 dice awards the Bonus Round. The number of Free Spins and the Multiplier value are calculated as follows:

- All blue dice are multiplied together to award the number of Free Spins. (Max in any one spin = $6 \times 6 \times 6 = 216$);
- All red dice are added together to create the Multiplier value. (Max in any one spin = $6 + 6 = 12$). If no red dice are visible, the Multiplier value is x1.

Re-Trigger

If 3, 4 or 5 dice appear in any one spin during the Bonus Round the following happens:

- All blue dice are multiplied together to award additional Free Spins. This value is added to the remaining Free Spin count;
- All red dice are added together to create the additional Multiplier value. This is added to the existing Multiplier value. If no red dice are visible, the existing Multiplier value remains the same.

Any coincidental reel wins are multiplied by the NEW Multiplier value.

Maximum Payout

If the maximum payout of $6,666 \times$ Total Bet is reached, all remaining Free Spins are cancelled.

Bonus Buy

Note: This is prohibited in a number of gaming jurisdictions and is automatically disabled where necessary.

Pressing the Bonus Buy button will display the Bonus Buy screen displaying the RTP, maximum payout and cost to purchase.

Pressing the Buy button will display a confirmation popup. Pressing the cross button will return to the Bonus Buy screen. Pressing the tick button will charge the player the displayed cost and start the bonus round.

The bonus round is triggered by the reels spinning to a minimum of 3 Scatters.

Please note:

When buying a bonus round, the cost is a multiple of the base game bet value. All prizes (and maximum payout) are therefore the same as if the bonus round had been triggered in the base game. For example, if the bonus round is bought (cost 75x) and the base game bet value is 1.00, the cost to buy the bonus round will be 75.00 and the maximum payout will be 6,666.

The game rules, general information and pay table are available to the player by pressing the menu button at any time that a game isn't in progress.

General Information

Random Game Play

This game is totally random; the odds of getting any particular outcome are always the same and are not based on any other factors or prior outcomes e.g. stake value, previous wins or losses, time of day, account balance, etc.

Return to Player Percentage

The expected return to player (RTP) reflects the theoretical return over a large number of plays. The RTP is expressed as the percentage returned to players in winnings of the total amount staked, e.g. if £1,000,000 was staked and £960,000 was returned, the RTP of the game for that period of play would be 96%.

The actual RTP during a playing session can vary widely, in either direction, from the theoretical return.

Game Info and Rules

Game rules and information can be accessed from inside the game in all formats by pressing the Menu button just above the clock at the bottom-right of the game area.
