

HIGH CARD FLUSH™

Beat the dealer with your best flush hand to win, if your flush cards are sequential then you can win big.

DETAILS

High Card Flush is an exciting new Poker game where wins are based on the number of cards the player has, which are of the same suit - a FLUSH.

The objective is to beat the dealer's hand with your best flush hand. The player and dealer receive seven cards each - whoever has the most cards of the same suit (flush) wins!

There are also two exciting optional side bets; **Flush Bonus**, which pays up to 300-1 and **Straight Flush Bonus** that pays up to 8000-1.

The more flush cards, the bigger the win, if these cards are sequential then the wins are even bigger!

DEVICES

BETS

High Card Flush

The player is dealt 7 cards, then selects the cards of the same suit (flush) to play. At this point the player can increase their BET up to 3x times their original ante or FOLD. If the player chooses to BET, they must have more cards of the same suit (flush) than that of the dealer to win.

RTP: 97.36%

Flush Bonus

The Flush Bonus bet is based on the number of cards in your hand that are the same suit; Flush. If you have four or more cards of the same suit then you will win up to 300-1.

RTP : 92.19%

Straight Flush Bonus

The Straight Flush Bonus bet is based on the number of cards in your hand that are the same suit (flush) and in sequential order. If you have three or more cards of the same suit and in sequential order, then you will win up to 8000-1.

RTP: 86.89%
