Merlin and the Ice Queen Morgana

Merlin and the Ice Queen Morgana is a 5x3-reel video slot game with up to 10 paylines.

SCATTER symbol can appear on ANY reel. The SCATTER also acts as a WILD that can substitute for any other symbol except for special EXPANDING SYMBOL to form a winning combination. SCATTER wins are multiplied by the total bet staked and are added to the payline wins.

MORGANA WILD appears on ANY reel. It can appear as a stack, and when landing fully stacked, it will trigger the MORGANA MULTIPLIER.

Fully stacked MORGANA activates x2, x3, x5 or x8 MULTIPLIER randomly. Activated MULTIPLIER is applied to all wins on the triggering spin. MORGANA MULTIPLIER is always available in base game and FREE SPINS. Activated MULTIPLIER is also applied to the SCATTER wins.

3 or more SCATTERS trigger an initial 10 FREE SPINS. 3 or more SCATTERS during FREE SPINS adds an additional 10 FREE SPINS. At the start of FREE SPINS, a random HIGH-PAYING or ROYAL symbol is chosen to act as a special EXPANDING SYMBOL, for the duration of FREE SPINS. After each spin's wins are evaluated, the special EXPANDING SYMBOL may expand to fill the entire reel, depending on which type of symbol was chosen. If the special EXPANDING SYMBOL is a HIGH-PAYING symbol, and there are at least 2 instances of that symbol on the reels, then each instance will expand to fill the reel it is on. If the chosen symbol is a ROYAL, and there are at least 3 instances of that symbol on the reels, then each instance will expand to fill the reel it is on. A reel filled with special EXPANDING SYMBOLS constitutes a winning combination on its own and doesn't require any symbols on adjacent reels. Multiple reels filled with special EXPANDING SYMBOLS constitute individual winning combinations. Special EXPANDING SYMBOLS have the same payout as non-expanding versions of that symbol. Wins for special EXPANDING SYMBOLS are calculated distinct from and after any winning paylines. Only the EXPANDED MORGANA WILD can substitute for a special EXPANDING SYMBOL to create a winning combination.

You can attempt to multiply your prize in the optional Gamble round. Press the GAMBLE button after winning a prize to start the round. Your objective is to correctly guess the colour or suit of a face-down card. Take your guess by clicking the appropriate button. If you correctly predict the colour, you double your prize. If you correctly predict the suit, you quadruple your prize. You can play the Gamble round up to five times in succession and up to a limit of 2500 coins.

Casino Standard Rules and Settings

WIN CALCULATION AND BETS:

1) Maximum wins are inclusive of the origin bet and based on the default bets for games
2) Underlined and bold values are default settings
3) Default settings can be changed by the operator
4) If the default settings/bets are altered, the maximum wins will be altered as well

CURRENCY:

1) All currency values relate to a currency multiplier of 1 which is accurate for EUR, USD, and GBP.
2) Other currencies, another multiplier might be used. For example: SEK has currency multiplier 10. All values related to currency should thus be multiplied by 10 for SEK. I.e. 10€ = $10 = £10 = SEK100.
3) All currency is marked with an asterisk (*) next to the caption in all tables.
