## Clover Jackpot Bonus

Drawing 3 Bonus symbols triggers the Clover Jackpot Bonus, during which players collect Bonus and Direwolf symbols to Hold the Jackpot and multiply it. Played on an 18-reel grid, the round starts with 3 re-spins, their number resetting every time a new symbol is drawn. With each Bonus symbol, players progress through consecutive Jackpots. 3, 4, 5 and 6 of these symbols guarantee, respectively, the Mini, Minor, Major and the Grand Jackpot. Each Direwolf symbol increases the total win multiplier by 0.5. It can reach even to 7x when the top and bottom rows are filled with 12 Direwolves.

## Bonus Symbol

A draw of 3 Bonus symbols triggers Clover Jackpot Bonus, during which Bonus and Direwolf symbols remain locked on the reels. The Bonus symbol may appear anywhere, but will be moved to the middle row, so up to 6 Bonus symbols may be drawn during the feature.

## Direwolf Symbol

Each drawn Direwolf symbol increases the win multiplier by 0.5, starting with the base of 1.5x when the first Direwolf is drawn. This symbol may appear in the Clover Jackpot Bonus, where it's collected on the top and bottom rows, and in the base game as well.

## Wild Symbol

Presented as a lucky four-leaf clover, Wild substitutes for other symbols except for special symbols.
