Game features

Free Spins Bonus

The Free Spins bonus is triggered by collecting in the Free Spins Gamble or directly when 5 Bonus Scatter symbols landing or cascade into view, during the base game. Cascades proceed in the same way as in the base game. The Multiplier, however, does not reset during Free Spins but builds throughout the feature with each win and cascade.

Faery Magic

The Faery Magic reel bonus is triggered randomly following a reel spin in the main game. The faery animates and casts spells to eliminate symbols on the reels. This initiates a cascade that will result in a win.

Free Spins Gamble

The Free Spins Gamble is triggered by 3 or 4 Bonus Scatter symbols landing in view, or cascading into view, during the base game. The player is offered the choice of collecting their current Free Spins or gambling for more in an "all or nothing" gamble. Choosing to gamble results in a pointer spinning. It can end up pointing to either green or red. Green is a win and steps the player up to the next level of Free Spins. Red is a lose and ends the game round with no Free Spins. A maximum of 2 gambles can be made when starting with 3 scatter symbols in view. A maximum of 1 gamble is allowed when starting with 4 scatter symbols in view. The gamble ends when the top level is reached, the player collects or a lose results.

Pop and Drop cascade feature

Any win will initiate a "pop and Drop" cascade. Any symbols involved in a win are removed from the reels. One or more Wild symbols are placed in the gaps produced and any remaining gaps are filled by existing symbols dropping from above. Fresh symbols are then also dropped from above to fill all remaining gaps and bring the number of reel symbols in view back up to 15. For every cascade, a multiplier doubles in value. This starts at x1 for the initial win and is applied to the current win created by the symbols in view on the reels. Subsequent wins will have a multiplier of x2, x4, x8, x16 etc. There is no limit to the multiplier. The resulting total of all wins obtained during the cascades are awarded to the player at the end of the game round. The Multiplier is reset to x1 at the end of the game round in preparation for the next game.
