### HOW TO PLAY

The objective of the game is to qualify for the live bonus game by collecting three scatter symbols during the qualification phase. Before entering the live bonus game, you'll be offered the chance to boost your multipliers in the Top-Up phase.

#### QUALIFICATION PHASE

To qualify for the live Coin Flip bonus round, you need to land three scatter symbols in one spin using a five-reel, three-row slot machine. Some scatter symbols have multipliers. Once you have qualified, all scatter symbols' multipliers are added together. This value is used to boost the multipliers in the Coin Flip bonus round.

A 'Turbo' button has been introduced for players who prefer faster gameplay, which allows you to switch between 'Normal' and 'Turbo' speed mode to speed up the slot spinning animations to reduce the spin time.

#### SPIN MODES

The qualification slot has three spin modes: Normal spin, XXXtreme spin and Super XXXtreme spin. The bet selected in Normal spin mode becomes your base bet and is used for calculating your winnings.

To help you qualify faster, you can activate any of the two XXXtreme spin modes. With the XXXtreme spin mode, you're guaranteed one scatter symbol in each spin at the cost of five times your base bet. Super XXXtreme spin mode costs 50x your base bet but guarantees two scatter symbols for each spin.

XXXtreme spins also offer more frequent multipliers.

### TOP-UP PHASE

Once you have qualified, you enter the against-the-clock Top-Up phase where you can boost the multipliers. This phase features a three-reel, three-row slot machine, with red and blue coin symbols, each containing a multiplier value.

If you wish to increase the multiplier values, you can choose to increase your Top-Up bet amount.

You win multipliers by collecting three coin symbols of the same colour in the middle row. The values of the won multipliers will be summed together and added to the total Top-Up multiplier for the won coin colour, red or blue.

Once the time has run out, you will be transferred to the live Coin Flip bonus round.

If you have qualified just before the bonus round begins, you can choose to stay in the Top-Up round and continue to top up and spin the Top-Up slot.

## COIN FLIP BONUS ROUND

Coin Flip bonus round with live game host generates the multipliers for both sides of the coin. These multipliers will contribute to your total winnings and are common for all the players.

After receiving the Coin Flip bonus round multipliers, all multipliers (Scatter multipliers, Top-Up multipliers and Coin Flip multipliers) will be calculated together and displayed separately on the blue and red side of the coin.

The game host will then pull a lever to flip the coin. Whichever side of the coin is facing up is considered the Coin Flip bonus round result and you will be paid according to the multiplier on the winning coin side.
