Business Summary

Step into the world of powerful rulers and incredible payouts in this 40-line slot. Turn rulers into Wild symbols on any spin to respin the reels and rack up rewards. Unlock 6 Free Games modes for even more excitement, where extra free games can be awarded. Go bold and win 1 of 4 Empire Treasures jackpots on any spin!

- ✓ 768 × 504 pixels Minimum to 1600 × 878 pixels Maximum for the NGM Desktop platform.
- ✓ As a mobile version (NGM) on all supported mobile devices.

For information on supported devices, see the **Playtech Mobile Platform Supported Devices** document compatible with the Mobile Platform release you are using.

The [Default Game Limits and Configuration](#) section provides important information on how to configure game limits to control house exposure.

Business Case

- Choice of 6 unlockable Free Games modes is a drawing card of this game, which provides the player with an interesting feature to chase.
- The Egypt, Rome, Kongo and China Free Games modes can be retriggered to create the potential for big wins.
- The India and Britain Free Games modes offer higher volatility than the other modes and award mega big wins.
- The Ruler Respin feature brings more opportunities to pocket cash prizes by turning more and more symbols Wild.
- The player can win 1 of 4 multi-level progressive jackpots on any spin.

Symbol Details

WILD SYMBOL

The symbol showing the letter 'W' on it is the **WILD** symbol in the game.

The **WILD** symbol can stand for any other symbol except the **SCATTER** symbol. There is also a separate payout for 3 or more **WILD** symbols on an active payline. This is paid out instead of the regular symbol win if the win amount from **WILD** symbols is larger than the win from the regular symbols (by the **WILD** standing in).

SCATTER SYMBOL

The red, blue and green boxes are the **SCATTER** symbols in the game.

3 **SCATTER** symbols landing simultaneously on reels 1, 3 and 5 will trigger the **Free Games** feature. **SCATTER** symbols can only land on reels 1, 3 and 5.

Game Features

Stacked Symbols

Ruler symbols (Egypt, Rome, Kongo, China, India and Britain) appear as single symbols on all reels during the main game, the **Ruler Respin** feature and **Free Games**. Ruler symbols also appear in 2-symbol high, 3-symbol high and 4-symbol high stacks during the main game, the **Ruler Respin** feature and **Free Games**.

Ruler Respin

During any main game spin, a feature frame can appear over the bottom symbol position on reel 5. If a ruler symbol lands in the frame, all symbols of that type will turn into **WILD** symbols before the wins are calculated.

The reels will then respin with the ruler symbol that landed in the frame transformed into **WILD** symbols.

During the respin, the feature frame will remain in position. If another ruler symbol lands in the feature frame, all symbols of that type will change into **WILD** symbols and trigger another respin. A respin can be triggered up to 5 times consecutively.

The feature ends when a non-ruler symbol lands in the feature frame. After the feature ends, any ruler symbols that turned **WILD** revert to their original state.

Free Games

3 **SCATTER** symbols landing on reels 1, 3 and 5 trigger the **Free Games** feature.

Free Games modes are unlocked by repeatedly triggering the **Free Games** feature. To unlock all 6 modes, the player needs to trigger the **Free Games** feature 6 times.

The **Free Games** modes are:

- **Egypt:** 15 free games. This mode is available from the first time the **Free Games** feature is triggered. The feature frame appears at the bottom of reel 5 for every free game. When a ruler symbol lands in the frame, all instances of that symbol are transformed into **WILD** for that spin result only.
- **Rome:** 12 free games. The feature frame is at the bottom of reel 5 during every free game. When any symbol other than a ruler symbol lands in the frame, the frame expands 1 position to the left. The frame can expand up to 4 times consecutively. When a ruler symbol lands in the frame, all instances of that symbol are transformed into **WILD** for that spin result only. The feature frame then resets to its original size for the next spin (if it was expanded).
- **Kongo:** 10 free games. The feature frame appears at the bottom of reel 5 for every free game. When any symbol, except **SCATTER**, lands in the feature frame, all instances of that symbol are transformed into **WILD** for that spin result only.
- **China:** 7 free games. 1-5 feature frames appear on the reels during every free game. Only 1 frame can appear per reel. When a ruler symbol lands in a frame, all instances of that symbol are transformed into **WILD** for that spin only.

- **India:** 5 free games. A 2x2 feature frame covers rows 3 and 4 of reels 4 and 5 during every free game. When ruler symbols land in the frame, all instances of these symbols are transformed into **WILD** for that spin result only.
- **Britain:** 2 free games. The feature frame appears at the bottom of reel 5 for both free games. When a ruler symbol lands in the frame, all ruler symbols present on screen become **WILD** for that spin only.

When the player lands 2 **SCATTER** symbols, 3 extra free games are triggered in any free games mode, except India and Britain.

When the player lands 3 **SCATTER** symbols, any free games mode is retriggered, except India and Britain.

No extra free games or retriggers are available in the India and Britain free games modes.

Empire Treasures™ Jackpot

The **Empire Treasures™ Jackpot** is a multi-level progressive jackpot feature. It is accumulated from all players' bets in all games which feature the **Empire Treasures™ Jackpot**, among all online casinos that offer these games.

There are 4 jackpots that can be won: **Mini**, **Minor**, **Major** and **Grand**.

The different jackpots hold different prize amounts.

The Jackpot for this game works like this:

Seed (how much money the jackpot starts out with):	Mini €100
	Minor €1,000
	Major €10,000
	Grand €200,000
Win condition (the result you have to get to win the jackpot):	The jackpot is triggered randomly on any spin in a slot game featuring the Empire Treasures™ Jackpot .
Win requirements (what you need to do to be eligible for the jackpot):	Play a slot game with the Empire Treasures™ Jackpot .

The result the player has to get to win the Jackpot:

- Jackpot game is triggered randomly on any spin in any of the linked games.
- Entering the Jackpot game guarantees a win of one of the four jackpots.

The **Empire Treasures™** Jackpot game has a reaction timer (30 seconds). Random symbols will be picked automatically if the player does not select symbols within the time limit. Jackpot winnings are added to the main game winnings (if any) and displayed in the win pop-up together with any other winnings.

Please note:

The seed and jackpot values are in EUR in the progressive network and their value in your local currency is dependent on the currency exchange rate specified by the casino.

The mechanics of the **Empire Treasures™ Jackpot** prohibit simultaneous jackpot winnings.

Imperfections in the internet connectivity may cause you to experience delays in jackpot messages or updates, but they do not affect actual jackpot wins.

Casino's Exposure

	€50.00			
	€1,767,300.00			
Casino Exposure Probability	1 in 1 billion spins			

Every casino operator should set a house exposure policy, which defines the maximum win amount it is willing to pay out on a single game round. The way to limit the house exposure is by limiting the maximum bet a player can place on a single game round.

For every game we calculate the maximum win multiplier from a single round (see "Maximum Overall Win" in the above table). Dividing the operator's maximum exposure policy by the game's maximum win multiplier will give us the maximum bet which the operator should allow in the game.

Game limits of all new games must ALWAYS be reviewed and, if necessary, adjusted by the casino operator prior to the game's release to production. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

For instructions on how to configure the game limits in the IMS, thereby controlling the level of exposure, see the last section of this document [Default Game Limits and Configuration](#). As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits.

The multipliers for all other currencies will be reviewed quarterly and updates will be communicated to **Account Managers** accordingly.

Default Game Limits and Configuration

Overview

To control the level of exposure of any casino game, its limits must be studied and configured correctly, following the casino’s exposure and risk policy.

 You can specify separate line bet values for the Mobile platform if you select “Casino” as the client type and “Mobile” as the client platform.

Casino operators must review the default limits of new games in the various supported currencies and re-configure them in the IMS, according to their policy.

The limits can be viewed and modified when the casino is still in preview mode. This enables casino administrators to fine-tune the limit definitions before switching the games to production, thereby eliminating any possibility of unwanted exposure.

Default Line Bet Values at Upload

At the time of upload, Playtech sets the maximum line bet to such a value that the maximum house exposure will be under €2,500,000 (2.5 million Euro) for games running on the casino server. For games running on the GTS Container, Playtech sets MAX WIN value to €500,000.

Playtech will upload the game with the default coin bet values below (note how the maximum coin bet in the list is per Playtech exposure policy):

CURRENCY	GROUP	TOTAL BET
