How to Calculate Payline Wins

Ways slots remove paylines to make it easier to see the wins. A win is formed from consecutive symbols starting from the first reel.

If any of the reels contain more than 1 instance of a symbol, the win will be multiplied.

Multiply the number of symbols on each of the reels to get the final payout multiplier.

For example, if the first reel contains 2 symbols, second reel 3 symbols and third reel 2 symbols, the payable value is multiplied by $2 \times 3 \times 2 = 12$.
