## A UNIQUE SPIN ON A BIG FAVOURITE

Dream Catcher is the first title in our Live Money Wheel game category aimed to appeal to your slot players.

Dream Catcher is an unequal game of chance played using a super-sized Money Wheel. Around the wheel and the game host is a state-of-the-art multi-camera studio installation with light and sound effects auto-synchronised to the game action.

Additionally, the game is extremely easy to play and appeals to slot players, seasoned casino players and novices alike.

Dream Catcher is different from other Money Wheels in that it features 2x and 7x payout multipliers and a fully immersive gaming experience for maximum excitement and player engagement. What's more, there is the potential to multiply wins many times over if the wheel stops on a multiplier segment on successive spins.

The winnings can keep on multiplying until the multipliers have reached the maximum 20,000 multiplier or a default maximum win of €500,000.

### KEY BENEFITS

- Appeals to slot players
- 2x and 7x multiplier
- Potential to multiply wins many times over
- Extremely easy to play.

### RETURN TO PLAYER (OPTIMAL)

95.65%.

## HOW TO PLAY

The aim of the main game is simple: the game host spins a super-sized, vertically mounted wheel and players predict the segment the wheel is going to stop at after the spin.

The wheel is divided into 54 equal segments separated by pins. 52 of the segments are marked with a number (1, 2, 5, 10, 20 or 40), with a unique colour for each number. The other two segments are coloured silver (2x MULTIPLIER) and gold (7x MULTIPLIER).

The player bets on the number at which they think the wheel will stop.

The payout odds are easy to remember as they match the numbers: e.g. a winning bet on 5 pays 5 to 1, 10 pays 10 to 1, and so on.

The wheel is spun by the game host. When the wheel comes to a stop, the winning segment is indicated by a flapper at the top of the wheel.

## MULTIPLIED WINNINGS

If the wheel stops on a multiplier segment, then all bets remain in place. No new bets will be allowed, and the wheel is spun again.

The outcome of the next spin (1, 2, 5, 10, 20 or 40) will determine the winning wager as usual, but the odds will be multiplied by 2x or 7x, depending on which multiplier the wheel stopped on in the previous spin. If the wheel stops on a multiplier again, then all bets remain in place, and the multiplier from the last spin is multiplied again. The dealer continues to spin the wheel until the spin ends with a result that is not a multiplier.

The multipliers can keep on multiplying until the multipliers have reached the maximum 20,000x multiplier or a default maximum win of €500,000.

## FIRST PERSON

First Person Dream Catcher is a beautiful and entertaining random number generator (RNG) version of our live Dream Catcher.

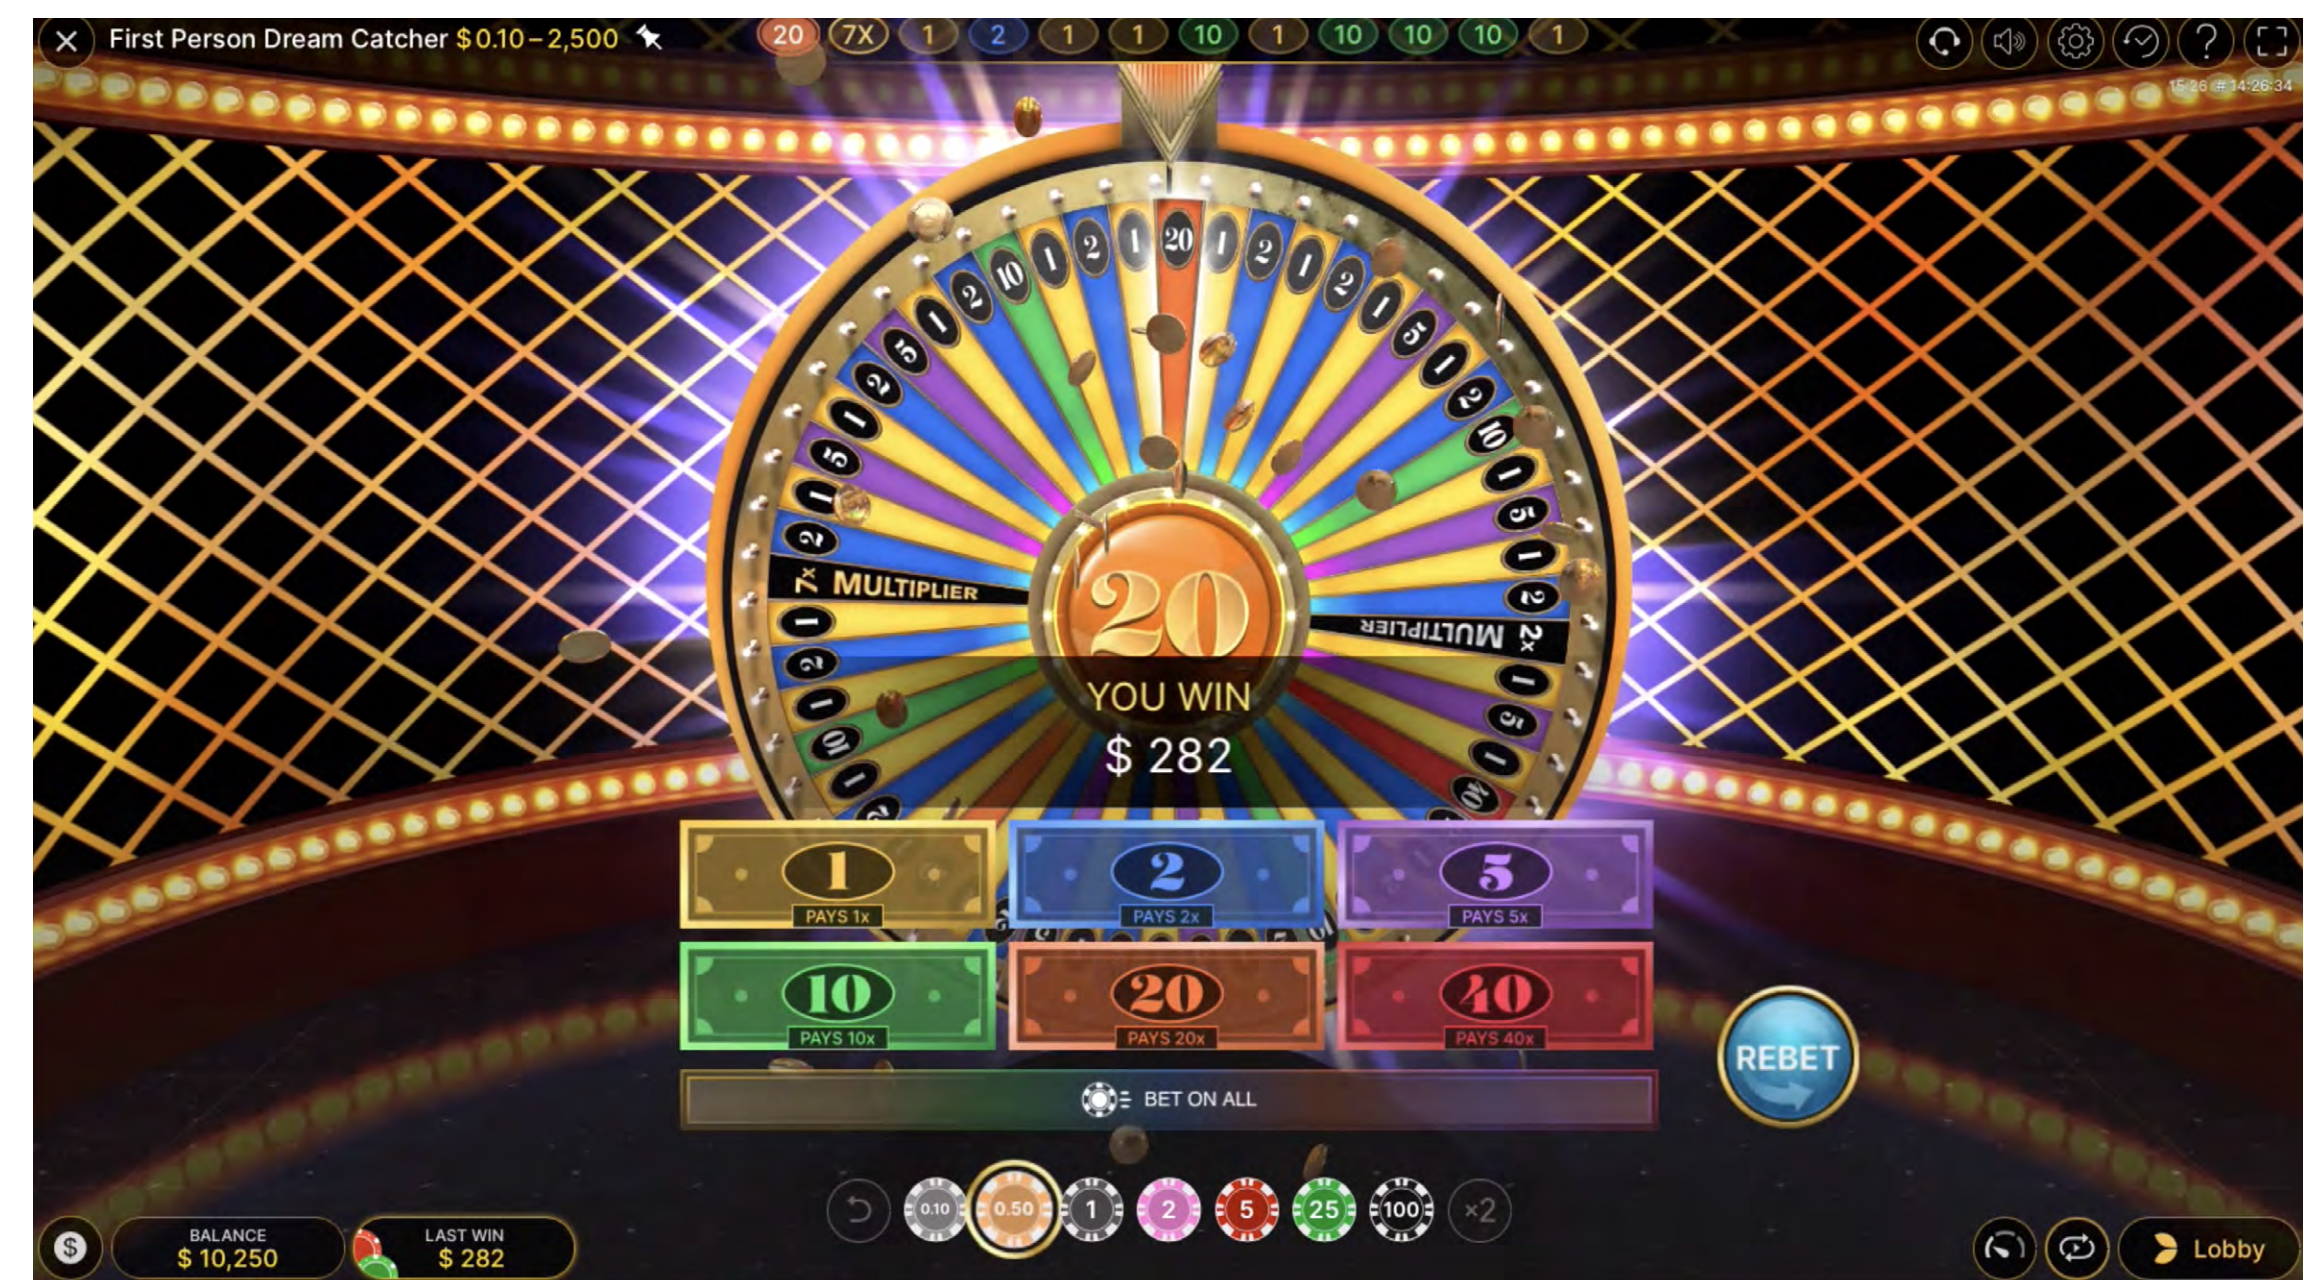

Superior 3D rendering and beautiful animation deliver an immersive gaming experience.

There's the same familiar user interface, rules and payouts as in live Dream Catcher, but in First Person Dream Catcher the player is in control and can play at their own pace.

Place a bet on 1, 2, 5, 10, 20 or 40 and spin the wheel! The game comes with 2x and 7x multipliers, offering the potential to multiply winnings many times over. The multipliers can keep on multiplying until the multipliers have reached the maximum 20,000x multiplier or a default maximum win of €500,000.

The Speed slider gives players control so they can play at their own pace (Fast, Normal and Relaxed).

Like all our First Person games, First Person Dream Catcher comes with the unique 'GO LIVE' button that takes you on a unique journey – through the in-game portal and directly to the live Dream Catcher game show.
