This is a 6×3 video slot with All Ways and 729 ways to win, Wild collection, Way multiplier feature and a Free Spins bonus game with bigger Way multipliers, special Wilds collection and unlimited free spins until you release the collected special Wilds.

## MAIN GAME

The main game has a 6×3 panel with All ways evaluated from left to right and 729 ways to win. Wilds can only appear on reels 2, 3, 4 and 5. Wilds substitute for any other symbol except the Scatter. Scatter pays on any position on the reels. 3 or more scatters trigger the free spins game. The main game features the Way multiplier feature, where random positions in the panel are highlighted and the symbols in them get a multiplier of up to 4.

Special Wilds are collected in a meter. Collecting 3 special wilds triggers a re-spin and all 3 collected wilds are randomly placed in the panel. The collector resets after the placement and any leftovers remain in the meter.

When 3+ scatters land on the reels it unlocks the Free spins bonus game, awarding 15 free spins.

- Special wilds are collected and stored per bet level.
- Collected special wilds are displayed in a meter with 3 slots.
- When all 3 slots are filled, a re-spin is triggered and all collected wilds fall in the panel at random positions.
- Placed Wilds will not overlap other Wilds or overlap each other when falling into the panel.

## HOW TO CALCULATE PAYLINE WINS

- To calculate the total 729 Ways to Win win, add all the symbol wins together.
- To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the left.
- If the number of consecutive reels containing the symbol is 3 or greater counting from the left, find the corresponding win amount in the pay table.
- If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example: if the first reel contain 2 symbols, the second reel has 3 symbols and the third reel has 2 symbols, the total multiplier is counted as follows:  $2 \times 3 \times 2 = 12$  (total multiplier).
- The above doesn't include any Free Spin symbols which pay scattered.
- All Way Wins are summed together after the spin.

- Calculate the total win in the home currency by multiplying the total coin win with the coin value.
