## HOW TO CALCULATE PAYLINE WINS

- To calculate your total payline coin win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the leftmost reel.
- If three or more identical symbols are lined up, find the coin win value in the Pay Table. There you can find the value for all symbols for 3, 4, 5 and 6 in a row. Only the highest winning combination per line is paid out.
- The above doesn't include any Free Spin symbols which pay scattered.
- If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- Calculate the total win in your home currency by multiplying the total coin win with your coin value.
