USA Flip

USA Flip is a 5-reel video slot game. Up to 20 lines can be activated, lines are numbered and always activated in numerical order (1, 2, 3, 4, etc.).

USA Flip includes a WILD symbol (Eagle Head), walking WILD symbol (Walking Eagle) and a SCATTER symbol (Star). The WILD and walking WILD symbols substitute for all other symbols except the SCATTER symbol.

Three or more SCATTER symbols on the reels trigger FREE SPINS. During FREE SPINS, the reels are flipped, reversing the order of the reels for an increased chance to win big! The FREE SPINS feature can be re-triggered by landing three or more SCATTER symbols on the reels at the same time. 12 additional spins are awarded for each re-trigger for a maximum of 120 FREE SPINS.

A near-win RE-SPIN is triggered on a losing spin whenever a full stack of the same symbol (including WILDS) land on the first reel and second reels, the middle reel will RE-SPIN with all other reels remaining locked. The FREE SPINS feature can be triggered by a RE-SPIN feature.

Stacked WILD symbols can land on the middle reel after RE-SPIN is triggered. The stacked WILD symbols become a walking WILD symbol that moves right by one reel for each RE-SPIN until landing on the last reel. An additional RE-SPIN occurs on all reels once the walking WILD has stopped on the last reel. During FREE SPINS, the walking WILD moves left by one reel until it stops on the first reel. While the walking WILD is active, SCATTERS can't land. If 3 SCATTER symbols land during the near win RE-SPIN feature, the walking WILD feature is not triggered, but the FREE SPINS feature is triggered instead.

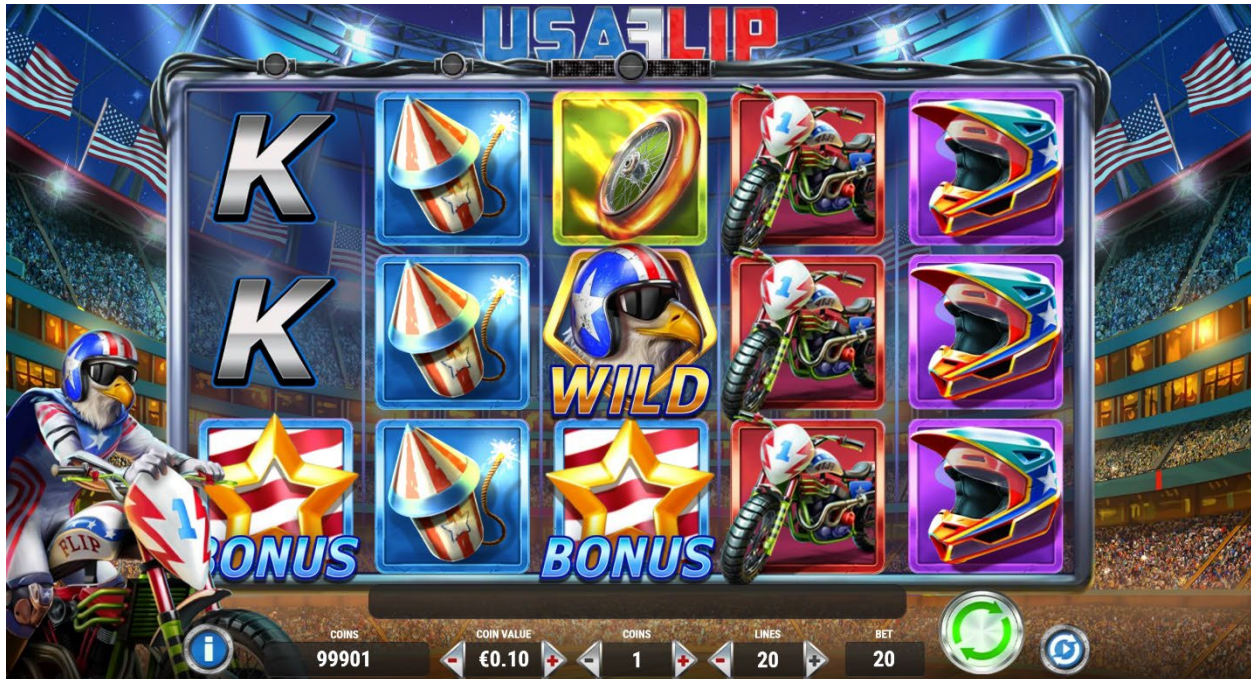

Stacked High-Paying symbols can land on the last 2 reels in the base game. During FREE SPINS, stacked High-Paying symbols will land on the first 2 reels.

All symbols can appear on all reels during the main game, during the FREE SPIN feature and during the near-win RE-SPIN feature.

Casino Standard Rules and Settings

WIN CALCULATION AND BETS:

- 1) Maximum wins are inclusive of the origin bet and based on the default bets for games
- 2) Underlined and bold values are default settings
- 3) Default settings can be changed by the operator
- 4) If the default settings/bets are altered, the maximum wins will be altered as well

CURRENCY:

- 1) All currency values relate to a currency multiplier of 1 which is accurate for EUR, USD, and GBP.
- 2) Other currencies, another multiplier might be used. For example: SEK has currency multiplier 10. All values related to currency should thus be multiplied by 10 for SEK. I.e. 10€ = \$10 = £10 = SEK100.
- 3) All currency is marked with an asterisk (*) next to the caption in all tables.
