WIDEST RANGE OF WORLD LEADING ROULETTE VARIANTS

Lightning Roulette is a unique, ground-breaking extended Roulette game that combines Live Casino with a high-payout RNG (Random Number Generator) element to revolutionise your Live Casino.

A key difference between Roulette and Lightning Roulette is the payout for a Straight Up bet. In Lightning Roulette, the Straight Up bet payout is 29:1, but the game adds the chance to win multiplied payouts on the Straight Up bet.

In every game round, between one and five Lucky Numbers are generated at random and struck by lightning. At the same time, each of the generated Lucky Numbers has a random multiplier applied to it: 50x, 100x, 200x, 300x, 400x or 500x. Naturally, this creates considerable extra suspense and excitement as each round spins by.

Presented in a stunning environment with an electrifying user interface – and with lightning bolts striking the Lucky Numbers in every round – Lightning Roulette also adds new levels of drama and excitement to traditional Roulette gameplay.

HOW TO PLAY

The objective in Lightning Roulette is to predict the number on which the ball will land by placing one or more bets that cover that particular number. The wheel includes the numbers 1-36 plus a single zero.

You can place many different kinds of bets on the Roulette table. Bets can cover a single number or a certain range of numbers, each type of bet has its own payout rate.

The ball is spun automatically by an Auto Roulette wheel and the game presenter will pull a lever to initiate the generating of Lucky Numbers after betting time has expired.

One to five Lucky numbers with random Lucky Payouts are generated and highlighted in the user interface.

The ball will eventually come to rest in one of the numbered pockets on the wheel. You win if you placed a bet that covers that particular winning number

If the winning number is among the randomly selected Lucky Numbers and is covered by a Straight Up bet, then the bet is multiplied with the Lucky Payout (random multiplier).

Autoplay is available if you wish to automatically play the same bets for a selected number of game rounds.

First Person Lightning Roulette from Evolution redefines RNG Roulette games by offering a world-class RNG (Random Number Generator) Roulette game with high payout multipliers.

The game's superior, animated 3D environment and electrifying user interface makes gameplay as close as possible to playing the live dealer version of Lightning Roulette.

Bets are placed from the player's chip stack, which is shown in 3D and updates to reflect the player's actual balance.

To place a bet, click on a chip and then simply click the appropriate betting spot/s on the betting grid.

After placing the bets, click the 'SPIN' button to start the spin of the ball.

Between one to five Lucky Numbers and Lucky Payouts are now generated and highlighted in the user interface.

If the winning number is covered by your bet and if it received a Lucky Payout multiplier, your winnings will be multiplied accordingly.

But that’s not all. First Person Lightning Roulette comes with the unique ‘GO LIVE’ button that takes players on a unique journey – through the in-game portal and directly to the Live Lightning Roulette table.
