Game features

Prebonus Rewards Reels

When a player lands 3 or more Scatter Symbols, they enter Free Spins - before that happens, they will go through Pre-Bonus Rewards Reel that will modify their Free Spins with chances to get them to a more rewarding starting point. The Reward Reel is a special “reel” that moved from left to right to display each of the possible Rewards, giving a spin through them to land on math predetermined outcome. The rewards are greatest for triggering free spins with 5 scatters and the least for triggering free spins with 3 scatters. The possible rewards are:
Number of Free Spins: 5, 6, 7, 8, 9, 10 Starting Ways: 486+, 2048+, 6250+ Starting Multiplier: 1x,

2x, 3x, 4x, 5x Multiplier Increment: +1x, +2x, +3x, +4x, +5x

Bonus Round Unlock

Fully increasing all reels to 7 symbols high in Free Games (Unlock), rewards the player 2 additional free spins. In addition, at the moment of unlock a random amount of Low Symbols (from 1 to 5) will be removed from the reels and for the duration of the Free Spins.

Base Unlock

When all reels are unlocked in the Base Game, player is instantly awarded 2 Free Spins with unlocked, random multiplier. They are automated spins. After they are completed, the game return to its Base Game state or, if 3+ Scatters landed during Free Spins, is moved to the Bonus Round.

Scatter Collection and High Pay Upgrade

The Scatter Symbols are collected during the Free Games. Every third Scatter Symbol collected upgrades a randomly selected High-pays symbol's pay table with a x5 or x10 Multiplier. If a symbol that already is upgraded to x5 Multiplier is chosen as a next reward, it will upgrade to x10 Multiplier.

WILD Symbol

Wild Symbols substitute for any other symbols on reels except Bonus Symbols.

PopWins™

Winning symbols 'Pop' and 2 new symbols appear in their place. Each reel can reach a maximum of up to the 6 symbols in the base game and 7 in Free Spins. PopWins™ ends when there are no more wins in the panel. PopWins™ are played with the same bet as the base game.

HOW TO CALCULATE WINS WITH “WIN ALL WAYS”

- To calculate your total WIN ALL WAYS win, add all your symbol wins together
- To calculate a single symbol win, count the number of subsequent reels that contain the symbol, starting from the left or the right

- If the number of subsequent reels containing the symbol is three or greater counting from the left, find the corresponding win amount in the paytable, otherwise, if the symbol was not present on three subsequent reels counting from the left, count from the right
- If the number of subsequent reels containing the symbol is three or greater counting from the right, find the corresponding win amount in the paytable
- If any of the reels contain more than 1 instance of the winning symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example, if the first reel contains 2 symbols, the second reel 3 symbols, and the third reel 2 symbols, the paytable value is multiplied in the following manner: $2*3*2=12$ (total multiplier)
- 5 of a kind wins only pay from one side
- During gameplay, different way wins are added together

PopWins™ feature
