## Target demographic

Players who like WILDS based games

Players who like GIGABLOX™ games

Players who like volatile games

Players looking for high octane fast paced games

Players who like to “Buy the Bonus”

# Game features

## Super Free Spins

During Free Spins: ALL LOW SYMBOLS ARE REMOVED ALL WILDS ARE LOCK & RESPIN ALL SPINS ARE PLAYED ON 6X6 AND 60 LINES EXTRA SPIN RETRIGGERS ARE FREQUENTLY AWARDED!

## Super Stretch Wilds

Landing a partial stack of wilds on any reel will result in those wilds expanding to fill the reel. A multiplier is applied depending on the size of the initial stack landed. For example if 2 symbols in a stack land then the wilds will expand and wins going through that reel will be x2. If 4 wilds land the award would be x4. Multipliers are cumulative though, so if a x2 stack and a x4 stack are in play together all wins through them are at x6! Sometimes GOLD wilds will be in play, these wilds work like regular wilds except they will lock and trigger a free respin. More gold wilds = more respins and huge wins!

## Gigablox™

The Gigablox feature creates massive symbols on every spin! Will you land the super-massive 6x6 symbols for EPIC win potential.

## Super Reel Expand

On any spin the reels can change size between 6x4, 6x5 and 6x6. When this happens the number of win lines active also changes to be 40, 50 or 60 respectively. Wehn 5x5 massive 5x5 GigvaBlox are possible, when 6x6 then 5x5 and super-massive 6x6 GigaBlox can land!

# Game rules

Welcome to SUPER CASH DROP GIGABLOX™, with SUPER STRETCH WILDS, SUPER FREE SPINS and SUPER REEL EXPANDS!

## About the Game

SUPER CASH DROP is a slot game with a reel size ranging from 6 x 4 to up to 6 x 6, which may change at random on every spin. Look out for stacks of wilds which trigger the SUPER STRETCH WILDS feature and LOCKED wilds which give free respins. During Free Spins, all wilds are Locked Wilds and all low paying symbols are removed!

## How to Play

- Select your total bet or use the default.
- Press the Spin button to start the game.
- Wins are multiplied by the bet.

**Gigablox™**

The game features the popular GIGABLOX™ reels where on each spin between 2 and 6 reels can merge to form a colossal GIGABLOX™ reel. GIGABLOX™ are oversized symbols that function like individual symbols in a 2×2 to 6×6 formation. Any symbol including Wild and Bonus symbol can land as GIGABLOX™.

### **Super Reel Expand**

- The game starts as a 6×4 array, but each spin, there is a chance for it to change to another size.
- The maximum array size is 6×6.
- Each array size includes additional win lines. 6×4 has 40 lines, 6×5 has 50 lines and 6×6 has 60 lines.
- The game remembers what size it is from session to session. Each bet has its own storage.

### **Super Stretch Wilds**

- If one or more wild symbol lands, all symbols on the reel are replaced by a wild.
- If more than 1 wild is landed, wins through the reel will be subject to a win multiplier. The multiplier on a reel's wilds are equal to the number of wild symbols that landed on that reel when the reels stopped.
- A Gigablox wild is counted as 1 wild for the purposes of the multiplier, which is calculated based on the number of vertical positions covered.

- Multipliers combined additively when they are applied to winning combinations that include those wilds.

### **Locked Super Stretch Wilds**

- There is a chance on every spin that wilds are LOCKED WILDS.
- If one or more locked wilds land, the SUPER STRETCH WILDS feature is triggered and plays out as described above. In addition, the wild reels then lock, including any multiplier, and the remaining reels receive a free respin.
- If one or more new locked wild symbols land during a respin, the SUPER STRETCH WILD feature is triggered as described, wins are paid, and another free respin is awarded. This continues until either all 5 reels are wild, or no further wilds are landed.

### **Super Free Spins**

How to trigger Free Spins

- Landing 5 or more BONUS scatter symbols triggers free spins. One free spin will be awarded for each symbol landed.
- BONUS scatter symbols that Gigablox will be split into singles for the purposes of the count.
- Free Spins can be won on the same spin as LOCKED wilds are landed. This can only happen on

the initial spin that triggers the feature, and although it is possible for reels containing winning scatter symbols to respin, your bonus has been stored and will start when the LOCKED SUPER STRETCH WILDS feature has completed.

### During Free Spins

- All spins will be played on the maximum reel size of 6×6 and 60 win lines.
- All low symbols are removed from the reels.
- Wild symbols are always Locked Wilds.
- Respins due to wilds are awarded in addition to free spins.
- Wild symbols have a higher chance of occurring during Free Spins.
- Additional free spins may be triggered during free spins by landing 1 or more BONUS scatter symbols, one spin is awarded for each BONUS symbol landed. BONUS Gigablox are split for the purposes of the count.

Free spins are played with the same lines and total stake value as the triggering spin.

### How to Calculate Wins

- To calculate the total win, add all the symbol wins together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.
- If three or more identical symbols are lined up, find the win value in the Pay Table. Only the

highest winning combination per line is paid out.

- Wild symbols will substitute for any symbol to create wins, except bonus scatter symbols or other special symbols not defined in the paytable.
- Individual wins are summed for you after the spin and the total win will be displayed either on or under the reels depending on the combined value.

### **Return to Player**

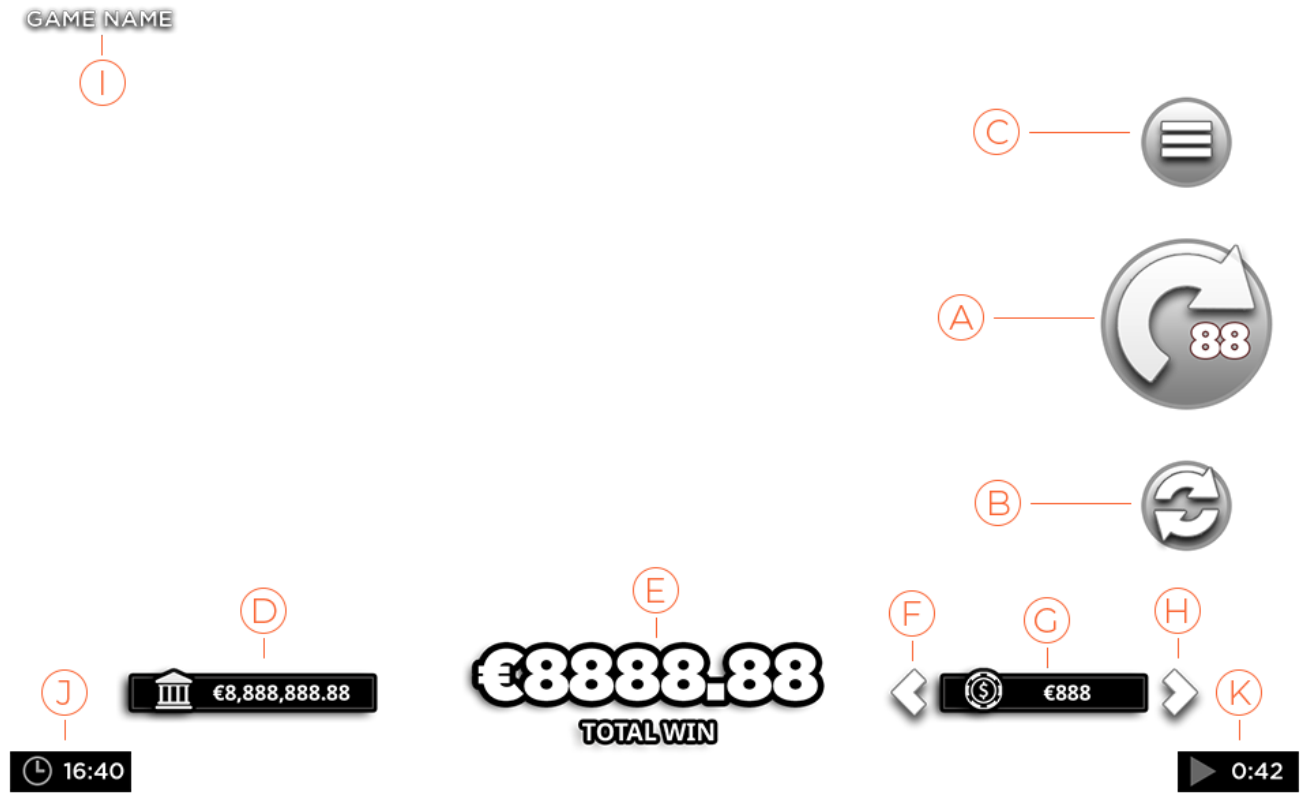

- The overall theoretical return to player is 95.5%
- The maximum recorded win is x5833 and happened once in 1.000.000.000 simulated game rounds.

### **Randomization**

- The reels are spun with a fair and equal chance for each stop position by a certified random number generator. For more information, visit <http://www.yggdrasilgaming.com/en/about-us>

# Game menus

## Game Panel

Expand this image

- A - Spin** - Initiates a new spin. Will also display the number of remaining spins during a free spin bonus or an autoplay session.
- B - Autoplay** - Players can make the game play without pressing the spin button each time. Will pop out a bar containing available options for the number of spins you wish to autoplay. Players can choose additional conditions for when to stop autoplay in the Game Settings. The loss limit in some game client versions prevent players from losing above a set limit during an autoplay session. Pressing the Autoplay button a second time stops the autoplay.
- C - Menu** - Will pop out a panel that contains buttons to access additional configuration options and information.
- D - Balance** - Total remaining player balance.
- E - Total Win** - The total win from the last spin, or during a bonus will be cumulative win from the entire bonus. Will only be visible when there is a win to display. Initiates a new spin. Will also display the number of remaining spins during a free spin bonus or an autoplay session.
- F - Lower Total Bet** - Will reduce the total bet by one available increment.
- G - Total Bet** - The current total bet – you can click this panel to open a pop up that will display all available Bet Per Spin options.
- H - Raise Total Bet** - Will increase the total bet by one available increment.

**I - Game Name** - Will show the game name (if enabled).
