

RED DOG

About

Gather your chips and grab a seat at the table to try your luck on this classic card game, where the rules are simple and the action fast - welcome to Red Dog. Place your initial bet and two cards will be dealt, with a space in the middle for a third card. To win the bet the value of the third card must simply fall anywhere between the values of the first two cards. The smaller the spread between the first two cards, the bigger the payouts can be, with up to 5:1 when the gap is only one card. Meanwhile, if the first two cards are consecutive or a pair then the bet will be a Push, since a winning third card is impossible - but for a pair a third card will be dealt, and a Bonus payout of 11:1 awarded for a lucky three-of-a-kind! Red Dog also gives the player the option to Raise the bet after the first two cards are dealt, thus doubling the stake and allowing for bigger wins when the spread is wider and the odds are firmly in your favour. "Good Luck" ... or should that be "Woof Woof"? Decks: 6
