Game rules

Welcome to Gator Gold Deluxe Slot with the signature Gigablox feature, Free Spins and Multiplier Wilds!

About the Game

Gator Gold Deluxe is a 6×4 Video Slot with 4096 way wins that pay out when 3* or more identical symbols land on 3 consecutive reels from the leftmost side. This slot features 11 regular symbols. There is a Free Spin symbol that pays out scattered and a Wild symbol that substitutes all regular symbols.

Gigablox™ Feature

Gigablox™ are oversized symbols on the reels that function like individual symbols in a 2×2 to 4×4 formation. Any symbol including the Wild and Free Spin symbol can land as Gigablox™. If a multiplier wild lands as a Gigablox™, its multiplier is only applied 1 time.

Free Spins

Land 5 or more Free Spin symbols to trigger Free Spins. Each Free spin symbol that triggered the Free Spins mode will award 1-3 Free Spins. Each Free Spin symbol that lands on the Reels in Free Spins adds 1-3 additional Free Spin. Free spins are played with the same bet as the activating spin.

Upgrade symbol

The Upgrade symbol only appears on 6th reel in Free Spins. Collecting 3 Upgrade symbols upgrades the all the current lowest high paying symbols on the reels to the next one in order of value. The highest possible upgrade is to the Gator Gold Symbol. If an upgrade symbol lands as a Gigablox™ it adds 1 for each slot position it covers to the collection. Multiple upgrades are possible in a single spin. The upgrade comes into effect on the same spin as the symbols land on the reels and lasts for the remaining Free Spins.

Wilds

There are 2 types of wilds in this game, Gator Wild (regular wild) and multiplier wild. The multiplier wilds multiply any win they are part of by the multiplier displayed in the symbol. Wilds cannot land

on reel 1. Multiplier Wilds multiply each other if they are part of the same Ways win.

Golden Gator

The Golden Gator symbol pays out from landing just 2* symbols from the leftmost reel.

How to Play

- Press the Spin button to start the game.(Players can also use the space bar on desktop)

How to Calculate Wins with Ways

- To calculate the total Ways win, add all the symbol wins together.
- To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the left.
- If the number of consecutive reels containing the symbol is 3 or greater counting from the left, find the corresponding win amount in the pay table.
- If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example: if the first reel

contain 2 symbols, the second reel has 3 symbols and the third reel has 2 symbols, the total multiplier is counted as follows: $2*3*2=12$ (total multiplier).

- Way Wins are summed together after the spin.
