Symbol Details

Wild Symbol

The Wild symbol may appear on all reels.

The Wild symbol substitutes for all symbols, except for the Red Joker symbol.

The Wild symbol upgrades the progress of all towers.

Red Joker Symbol

The Red Joker symbol may appear on all reels.

The Red Joker symbol may land partially or fully.

If the The Red Joker symbol lands partially on reels, it doesn't affect the progress or Cashpot.

If the The Red Joker symbol lands on all 3 reels, it resets the progress and the Cashpot to zero.

Game Rules and Features

Joker's Luck Deluxe™ is a 3-reel game with Wild, Red Joker and golden symbols. There are 3 types of golden symbols: bells, stars and lucky shoes. Each type has a corresponding Cash Tower above the reels.

Each golden symbol may consists of 1, 2 or 3 elements. When symbols land they increase the corresponding Cash Tower by 1, 2 or 3 levels accordingly, and this payout is added to the Cashpot.

After the Cash Tower is fully filled any additional matching symbol pays out the prize, that is shown above it. If the number of matching symbols is greater than the visible number of steps, the special indicator appears showing the number of exceeding steps. And the certain win amount per exceeding step is moved directly to the balance.

The Wild symbol updates all towers:

- 1 Wild symbol updates Cash Towers by 2 steps;
- 2 Wild symbols update Cash Towers by 4 steps;
- 3 Wild symbols update Cash Towers by 8 steps.

The win amount on towers changes with the bet amount. A player can change the bet only when the Cashpot is empty.

To get a win directly into the balance, a player needs to fill one or more towers completely. Other winnings are collected into the Cashpot, that displays the sum of the current cash amount of each tower. The player can transfer a win anytime, moving the full amount in the Cashpot into their balance by pressing the Collect button. The Collect button also resets all towers back to zero.

A game round begins when the player presses spin and continues until they collect the Cashpot or the Red Joker symbol lands on all reels, resetting the towers and the Cashpot to 0. One game round can contain several spins.

The game has a autoplay, where a player can choose the number of spins and the Cashpot limit.

Casino's Exposure

The casino's maximum exposure from a single game round is limited by the win capping mechanism. The win capping defines that the total win from a single game round cannot exceed 500,000 Euro. Should the total win from a game round exceed this number, the total win will be capped.

Top Win information per bet got during simulation of 1,000,000,000 bets:

Highest win	700 x Total Bet
10th highest win	675 x Total Bet
100th highest win	550 x Total Bet

It is highly inadvisable to exceed the pre-set win capping values and game limits.

Please contact the Skywind support team if you want to make changes in the Coin values.

Game limits of all new games must ALWAYS be reviewed by the casino operator prior to the game's release to players. Failure to set the required maximum limit may result in the casino's exposure to large player wins.

As always, licensees are welcome to contact their Account Manager for further assistance in understanding and configuring game limits and updates of coin values.
