Introducing Gold Vault Roulette – the ultimate golden opportunity for players seeking thrilling entertainment and multiplied rewards!

### HOW TO PLAY

The objective of the Gold Vault Roulette is to predict the number on which the ball will land by placing one or more bets that cover that particular number. The wheel includes the numbers 1-36 plus a single zero.

You can place many different kinds of bets on the Roulette table. Bets can cover a single number or a certain range of numbers; each type of bet has its own payout rate.

#### START OF THE GAME

To participate in the game, place one or more chips on the betting grid.

After betting time has expired, the dealer spins the ball within the Roulette wheel and opens a safe with four boxes to reveal five to twenty randomly generated Gold Bars in total.

#### GOLD BARS

Each Gold Bar acts as a 50x multiplier and will automatically be assigned to a random bet spot.

Up to three Gold Bars can be stacked onto a single bet spot, allowing the total multiplier value to reach up to 150x.

### SUPER GOLD BARS

During certain game rounds, a rare Super Gold Bar may appear, worth an impressive 500x. However, only one Super Gold Bar per round can be revealed, and its multiplier will be randomly assigned to a bet spot.

Super Gold Bars cannot be stacked with Regular Gold Bars, and vice versa.

### THE RESULT

The ball will eventually come to rest in one of the numbered pockets in the wheel. You win if you have placed a chip on that particular winning number.

If the winning number is covered with any Gold Bar multipliers, your payout is multiplied accordingly.

'Autoplay' is available if you wish to automatically play the same bets for a selected number of game rounds.
