MYSTERY WOODS

Mystery Woods is a classic **5x3 slot**, a format which continually proves to be a player favourite. The game operates across **20 pay-lines**, with a Mystery Reveal Symbol generating anticipation for big wins as it transforms across the reels into the same symbol.

During the base game or freespins these **Mystery Symbols** can reveal a **Golden Tree**, which respins itself to award players a multiplied payout of their stake.

Three scatter symbols on the board sends the player to Mystery Woods' freespins, where they play through the games progression system. For each Mystery symbol landed, the player progresses a level, and removes a symbol from play, until at the top level they're left with only **the highest paying characters**.

This progression adds an element of gamification and with it anticipation of some impressive returns. The system is highly intuitive, and provides an extra level of engagement to already **solid core gameplay**.
