Cash of Ccommand

WHAT'S THE STORY?

It's a battle of the sea and skies!

Lead your fleet and command your admirals as you endeavour to outsmart your enemies and claim victory as your own.

But keep your wits about you as you may find yourself in enemy waters...

FEATURES

Watch the story unfold with every spin. Commanders sit to the side of the reels and appear once a specific number of symbols have been collected through winning clusters until finally battling with the 'Baron Fusco'.

Each character provides a new way to help players reach their maximum potential whether that's adding Wilds to the grid or transforming symbols.

Rather than simply cascading, battleships at the bottoms of the grid are animated and blast symbols on the grid to remove them from the grid which cleverly complements the theme.

A classic grid slot with cascading symbols that is by no means typical as we've pushed innovations to the next level with features meet narrative in this dynamic title.

Full speed ahead!
